Mr. Michael Michels
Dept. of Computing Science
University of Alberta
General Services Bldg.,
Edmonton, AB
T6G 2H1

Dear Mr. Michels:

I am writing to congratulate you on your award of a Natural Sciences and Engineering Research Council Undergraduate Student Research Award for 1988-89. Your selection for this award indicates that you are considered by your university to have great promise for a career in science or engineering.

The objectives of this program are to stimulate the interest of undergraduate students in research by providing them with a valuable period of research in a university laboratory, and to encourage such students to undertake graduate studies in due course. I hope that you will indeed benefit from your tenure of this award and that it will kindle a desire to continue your studies at the master's or doctoral degree level.

If you have any comments concerning your experiences while holding this award, whether they be positive or negative in nature, I shall be glad to hear from you.

Yours sincerely,

R.J. Kavanagh
Director General
